

I fully support xmradio. I've been using xmradio since last year and I'm one hundred percent behind them. I benefit from listening to XM Satellite Radio and its traffic and weather channels. I also enjoy when Satellite radio provides me with the variety and quality that are not available elsewhere else. Besides, I'm not doing this illegally and if I were doing so illegally, I would fully understand and I would be totally against anyone using it in that way. I also pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming their listeners demand and deserve.
